

If you are a parent who follows the CDC's VACCINE schedule, here are 20 FACTS you need to know to make an informed decision:

1. Vaccine manufacturers have NO liability (National Childhood Vaccine Injury Act of 1986), so CANNOT be sued for injury from their product and they have no incentive to make their product as safe as possible.
2. Vaccines are not held to the same double blind gold standard of clinical testing as other pharmaceutical drugs because they are considered biological products under the Public Health Federal Food, Drug and Cosmetic Act. They meet the same standards as cosmetics.
3. The per vaccine Federal Excise Tax is used to pay the vaccine injured through the government-created National Vaccine Injury Compensation Program (NVICP). \$3.1 Billion has been paid to date (through 2015).
4. Vaccines contain neurotoxins (aluminum and mercury) far exceeding "safe levels" deemed by the EPA.
5. Vaccines contain cancer-causing ingredients, and have never been tested if they cause cancer, infertility or DNA mutation (Section 13.1 of every vaccine package insert).
6. Some vaccines are made from aborted fetal cell lines. (WI-38 and MC5-5 Human Cell Fibroblasts)
7. Vaccines are not 100% effective and a vaccinated person can get the disease they were vaccinated for.
8. A vaccinated person carries the disease they were vaccinated for, "shedding" it, for up to 6 weeks.
9. The concept of herd/community immunity cannot be achieved by vaccines because vaccines are NOT 100% effective. Unlike lifetime immunity afforded by disease, vaccine-induced immunity lasts 2-10 years.
10. Doctors receive financial rewards from insurance companies for having patients fully vaccinated (~\$400 per patient). They are advised NOT to share all the risks or the vaccine package inserts, so 100% informed choices cannot be made in a doctor's office when vaccinating.
11. Vaccine injury is under-reported. VAERS is the only way to officially report a vaccine injury and is tedious with no incentive for a doctor to fill it out.
12. Vaccine mandates (like SB277 and SB792 in CA) literally hand over new customers to pharmaceutical companies, and remove rights to choose what is injected into a person's body.
13. Pharmaceutical companies spend up to 19 times more on advertising than they do on research.
14. Corporate mainstream media gets 70% of their advertising revenue from pharmaceutical companies.
15. Vaccine safety and efficacy research is not conducted by independent researchers and so is biased.
16. The full CDC recommended vaccine schedule has never been tested. Vaccinated children are the human experiment.
17. All vaccines can cause injury or death, and there is no way to tell who will have a reaction.
18. Most doctors receive 30 MINUTES on vaccine education (that they are safe, effective and a must) during their 8 YEARS in medical school.
19. If someone dies from a vaccine, their family will be awarded no more than \$250,000. Most cases of vaccine injury are dismissed because doctors and vaccine manufacturers deny a causation link. The statutory time limit for filing a claim is only 2 years after death and 3 years from the time of vaccine injury.
20. The government plan "Healthy People 2020" has a goal to fully vaccinate all children and adults by 2020. There are 217 new vaccines being created right now.

DO YOUR OWN RESEARCH BEFORE YOU VACCINATE.

This is too important to ignore.

Isn't your baby worth the time and effort to get engaged and educated?

A VOICE FOR CHOICE

Giving issues a voice, A Voice for Choice advocates for people's rights to be fully informed about the composition, quality, and short- and long-term health effects of all products that go into people's bodies, such as food, water, air, pharmaceuticals and cosmetics. www.AVoiceForChoice.org

Are you pregnant? Per the CDC, your doctor will recommend you get the Tdap Vaccine.

<http://www.cdc.gov/vaccines/parents/downloads/parent-ver-sch-0-6yrs.pdf>

There are two Tdap Vaccines available in the US - Adacel® (Sanofi Pasteur) and DAPTACEL® (GlaxoSmithKline). Both package inserts state the vaccine has NOT been tested on pregnant women and it is unknown if they will cause fetal harm yet doctors are prescribing them during pregnancy. If your baby is prone to a vaccine injury, you will not witness a change in your child's development after birth because the damage happened in utero, and your child was "born that way."

8 USE IN SPECIFIC POPULATIONS

8.1 Pregnancy Pregnancy Category C

Animal reproduction studies have not been conducted with Adacel vaccine. It is also not known whether Adacel vaccine can cause fetal harm when administered to a pregnant woman or can affect reproduction capacity. Adacel vaccine should be given to a pregnant woman only if clearly needed.

Animal fertility studies have not been conducted with Adacel vaccine. The effect of Adacel vaccine on embryo-fetal and pre-weaning development was evaluated in two developmental toxicity studies using pregnant rabbits. Animals were administered Adacel vaccine twice prior to gestation, during the period of organogenesis (gestation day 6) and later during pregnancy on gestation day 29, 0.5 mL/rabbit/occasion (a 17-fold increase compared to the human dose of Adacel vaccine on a body weight basis), by intramuscular injection. No adverse effects on pregnancy, parturition, lactation, embryo-fetal or preweaning development were observed. There were no vaccine related fetal malformations or other evidence of teratogenesis noted in this study.

8.3 Nursing Mothers

It is not known whether Adacel vaccine is excreted in human milk. Because many drugs are excreted in human milk, caution should be exercised when Adacel vaccine is given to a nursing woman.

https://gsksource.com/pharma/content/dam/GlaxoSmithKline/US/en/Prescribing_Information/Boostrix/pdf/BOOSTRIX.PDF (Page 11)

8 USE IN SPECIFIC POPULATIONS

8.1 Pregnancy Pregnancy Category B

A developmental toxicity study has been performed in female rats at a dose approximately 40 times the human dose (on a mL/kg basis) and revealed no evidence of harm to the fetus due to BOOSTRIX. Animal fertility studies have not been conducted with BOOSTRIX. There are no adequate and well-controlled studies in pregnant women. Because animal reproduction studies are not always predictive of human response, BOOSTRIX should be given to a pregnant woman only if clearly needed.

In a developmental toxicity study, the effect of BOOSTRIX on embryo-fetal and pre-weaning development was evaluated in pregnant rats. Animals were administered INFANRIX by intramuscular injection once prior to gestation and BOOSTRIX by intramuscular injection during the period of organogenesis (gestation Days 6, 8, 11, and 15), 0.1 mL/rat/occasion (approximately 40-fold excess relative to the projected human dose of BOOSTRIX on a body weight basis). The antigens in INFANRIX are the same as those in BOOSTRIX, but INFANRIX is formulated with higher quantities of these antigens. No adverse effects on pregnancy, parturition, lactation parameters, and embryo-fetal or pre-weaning development were observed. There were no vaccine-related fetal malformations or other evidence of teratogenesis.

8.3 Nursing Mothers

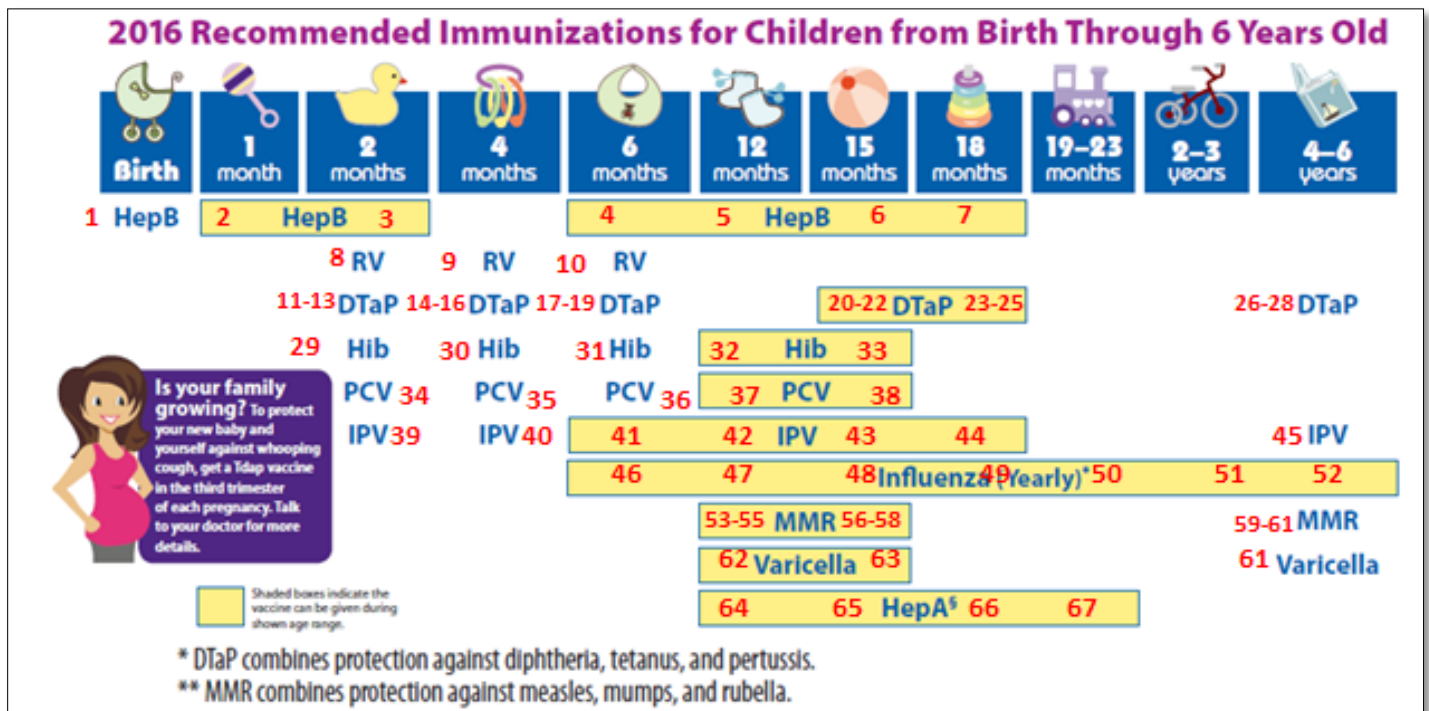

It is not known whether BOOSTRIX is excreted in human milk. Because many drugs are excreted in human milk, caution should be exercised when BOOSTRIX is administered to a nursing woman.

A VOICE FOR CHOICE

The CDC Vaccine schedule does not look so bad until you count the number of ACTUAL DOSES (shown in red next to each vaccine acronym):

The number of vaccines has grown exponentially since 1986, when the Vaccine manufacturers no longer had liability of their products.

Vaccine Schedule History (0-18 years)

By Late 1940s	By Late 1970s	2015	# of Doses in 2015
Smallpox			
Tetanus*	Diphtheria*	Diphtheria*	6
Diphtheria*	Tetanus*	Tetanus*	6
Pertussis*	Pertussis*	Pertussis*	6
	Polio (OPV)	Polio (IPV)	4
	Mumps**	Measles**	2
	Measles**	Mumps**	2
	Rubella**	Rubella**	2
		Hib	3
		Hepatitis B	3
		Hepatitis A	2
		Varicella	2
		Pneumococcal	4
		Influenza	19
		Rotavirus	3
		HPV	3
		Meningococcus	2

* Combination DTP
** Combination MMR

Taken from CDC Schedule History

217 Vaccines Currently in the Pipeline

Total = 69 Doses (49 before age 6)
